Job Offer: Production Employee / Service Technician (m/f/d)

zactrack® is an automated tracking system for theater stages, studios, and open-air events. The movements of actors on stage are tracked using various methods, recorded in a 3D computer model, and precisely followed in real-time using different lighting and effect devices.

To strengthen our production team, we are looking for a motivated employee.

Responsibilities:

- Repair of electronic assemblies
- Final assembly of products including execution of test routines (electrical/mechanical)
- Assembly of prototypes

Requirements:

- Completed technical college (HTL) education in the field of electrical engineering/electronics/mechatronics

Especially important:

- Experience in soft soldering and SMD hot air soldering
- Experience with electronic components and understanding of their functions
- Ability to read and understand circuit diagrams
- Precise and independent working style
- Quick comprehension
- Reliability and commitment

Skills and Languages:

- Knowledge in microcontroller programming (C, C++)
- German and English, spoken and written

Employment Type:

Full-time or part-time (minimum 25 hours/week)

As an employee or freelance contractor

We look forward to your application at job-application@zactrack.com
